

# A Clean Alternative to Crystal Microdermabrasion.

## Why Hydrabrasion...

Give your clients a choice when it comes to their skin rejuvenating treatment with a crystal free alternative to microdermabrasion. With the Hydrabrasion system you can give your clients the benefits of softer, smoother, healthier looking skin without the use of crystal.

## How it works...

The Hydrabrasion treatment combines the exfoliating action of its abrasive tip and the stimulating action of the vacuum with the hydrating effects of water for a natural and effective exfoliation treatment. As the abrasive tip is swept over the skin, dead skin cells are removed from the superficial layer of the skin uncovering the healthy, vibrant skin beneath. With an assortment of abrasive tips, you are able to choose the power of abrasion that's right for your client.

## Newest Technology...

Unlike many other crystal free options, the Hydrabrasion system uses fully disposable tips so cross contamination between clients will never be an issue. The Hydrabrasion's proprietary filtration system is equipped with a HEPA filter to prevent dust and other particles from being incorporated into your treatment, further ensuring a clean environment for your client and their treatment.

## Affordable...

The Hydrabrasion system simply adapts to your existing microdermabrasion system, meaning you don't have to worry about the added expense of acquiring high cost bulky equipment for your practice. Simply invest in the inexpensive Hydrabrasion starter kit and start offering your clients the benefits of a Hydrabrasion treatment.
